Manufacturer:	Intel Corp
Package/Case:	QFP
Product Type:	Programmable Logic ICs
Lifecycle:	Obsolete

## General Description

EPM3064ATC100-7 is a type of Programmable Logic Device (PLD) manufactured by Altera Corporation (now part of Intel Corporation).

## Key Features

It has 64 macrocells that can be used as flip-flops or latches

64 inputs and 64 outputs

3.3V to 5V operation

100-pin TQFP package

7ns maximum propagation delay

## Application

EPM3064ATC100-7 can be used in a variety of applications, including digital signal processing, video and image processing, communication systems, and control systems.

It can be used for implementing custom logic functions in FPGA-based designs.
