

FPGA Configuration EEPROM Memory

Manufacturer:	Microchip Technology, Inc
Package/Case:	PDIP8
Product Type:	Programmable Logic ICs
RoHS:	RoHS Compliant/Lead free 
Lifecycle:	Active

General Description

Microchip 512-Kb FPGA configuration EEPROM with Altera Pinout provides easy-to-use, cost-effective configuration memory for FPGAs. It comes in 8-lead PDIP and the 20-lead PLCC packages. This EEPROM can configure one or more FPGA devices through a simple serial-access procedure. Users can select the polarity of the reset function by programming four EEPROM bytes. The device also supports a write-protection mechanism within its programming mode. It can be programmed with industry-standard programmers, the Microchip ATDH2200E programming kit, or the Microchip ATDH2225 ISP Cable.
